

AXIS P85 Network Camera Series

Discreet, eye-level cameras for identification

- > Discreet eye-level cameras for identification
- > Up to HDTV 1080p
- > Choice of colors and form factors
- Model with Wide Dynamic Range – Forensic Capture

AXIS P85 Series offers eye-level, pinhole cameras installed in a pipe or height strip housing for discreet, indoor video surveillance—ideal for retail, hotel and banking environments. For placement near exits of buildings, AXIS P85 cameras are positioned to look straight at a person's face for more reliable identification even when the person is wearing a hood or baseball cap.

The series comprises AXIS P8514 and AXIS P8524 (both with HDTV 720p and a 57° horizontal field of view), as well as the advanced AXIS P8535 with HDTV 1080p, a wide 92° horizontal field of view and Wide Dynamic Range – Forensic Capture that enables superb performance in scenes with high-contrast lighting and low light.

AXIS P8514 comes in three, floor-to-ceiling pipe versions: black, chrome and white with a metric or imperial height indicator to enable eyewitnesses to gauge the height of a person. The camera inside the pipe is placed at a height of 160 cm (5.2 ft).

AXIS P8524 and AXIS P8535 have a rectangular form factor in black or silver with a height indicator in metric

or imperial measurement. The sensor unit (lens and image sensor) is mounted at a height of 170 cm in the metric model and 5.5 ft in the imperial version. The sensor unit has a cable for connection to the main unit, which can be placed out of public view.

AXIS P85 cameras support Power over Ethernet, and their viewing direction is easily adjustable. AXIS P8524 and AXIS P8535 enable local storage of recordings and connection to external devices. AXIS P8535 also supports audio and RS232 for integration of external data to the video.
